Public Store Annual Report 2025

Anand Taori | LinkedIn

🎯 Objective of the Project

- ❑ 📊 **Analyse overall sales performance** across months, states, and channels
- ❑ 🛒 **Understand customer behaviour** based on age, gender, and purchase patterns
- ❑ 📈 **Identify top-performing areas** (states, platforms, time periods)
- ❑ 🔍 **Track order trends** (growth, decline, seasonality)
- ❑ 📦 **Evaluate order status** to measure delivery success and issues (returns, cancellations)
- ❑ 🎯 **Identify key revenue drivers** (e.g., women customers, top platforms like Amazon)
- ❑ 💡 **Provide data-driven insights** to improve sales, marketing, and operations

🧹 Data Cleaning Steps

🔍 **Check for null values**

- Ensure no missing values in key columns like **Order ID, Gender, Quantity**
- Remove or handle blanks if found

🔤 **Standardize Gender column**

- Replace:
  - M → **Male**
  - F → **Female**

🔢 **Convert Quantity to numeric**

- Replace text values:
  - one → 1
  - two → 2

👥 **Create Age Group (Using IF Formula)**

Use nested IF:

=IF(Age>=50,"Senior",IF(Age>=30,"Adult","Teenager"))

📅 **Extract Month from Date**

Use TEXT function:

=TEXT(Date,"MMM")

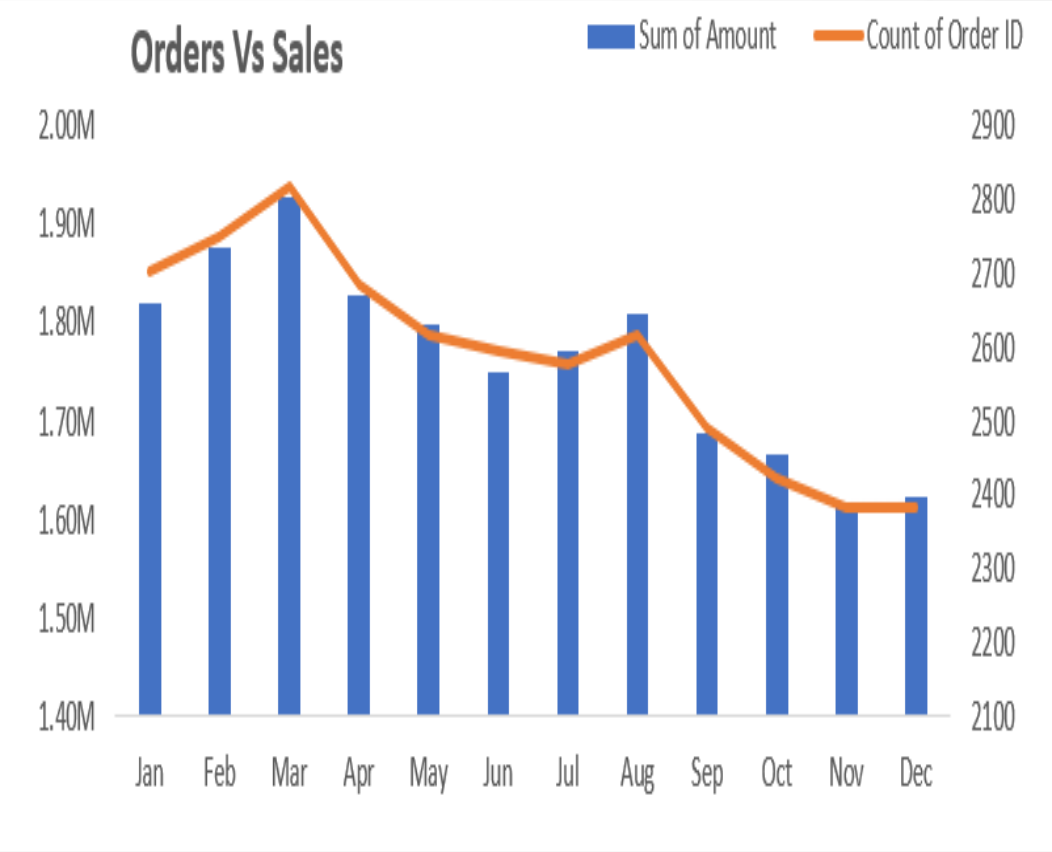
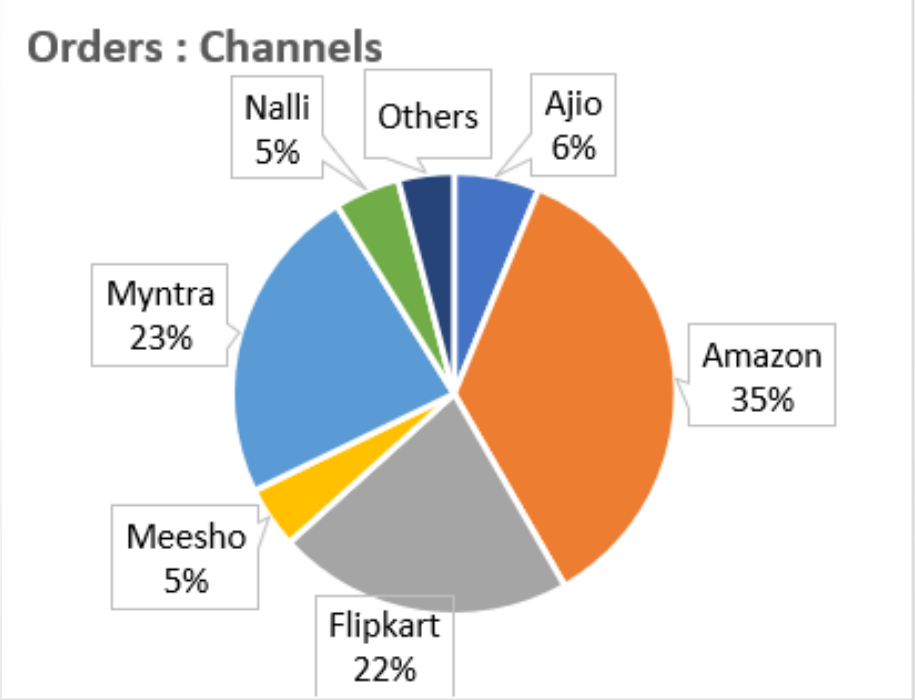
Comparison of Sales & Orders

- 📈 **Peak in March** → Highest sales (~₹19.28L) and orders (2819)
- 📉 **Decline from April to June** → Both sales and orders drop
- 🔄 **Slight recovery in July–August** → Small increase in performance
- ⚠️ **Lowest period: Sep–Nov** → Sales and orders at minimum
- 📊 **December stabilizes** → Slight improvement in sales
- 🔗 **Strong correlation** → More orders = higher sales
- 📅 **Seasonal trend** → Strong Q1, weak Q4



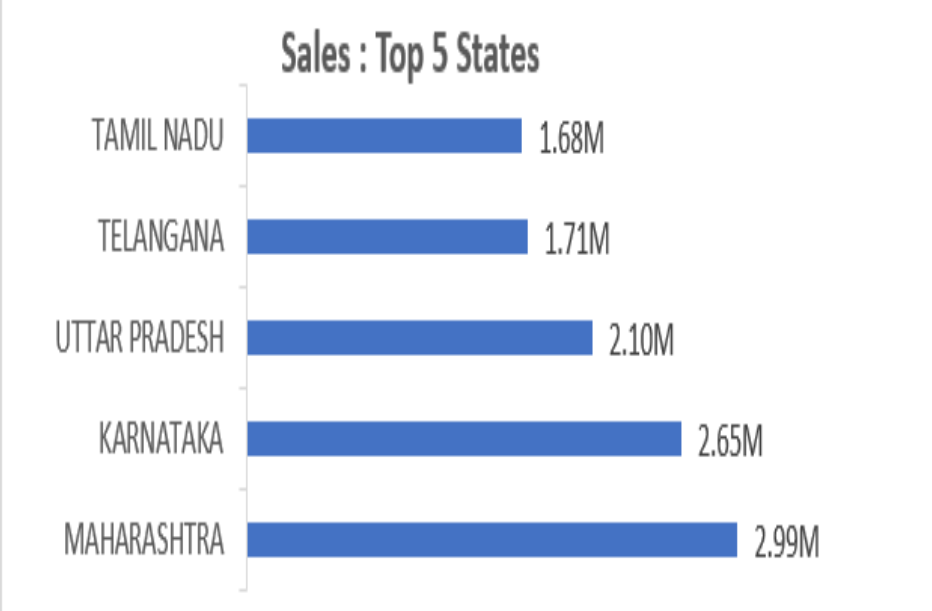
Order Distribution By Sales Channel

- 🥇 **Amazon (35.5%)** → Highest contribution
- 🥈 **Myntra (23.4%)** and **Flipkart (21.6%)** → Major contributors
- 📉 **Ajio (6.2%), Meesho(4.5%), Nalli (4.8%), Others (4.1%)** → Smaller share
- 🔝 **Top 3 channels (Amazon, Myntra, Flipkart)** contribute ~80% of orders
- 📊 Business is **highly dependent on a few key platforms**



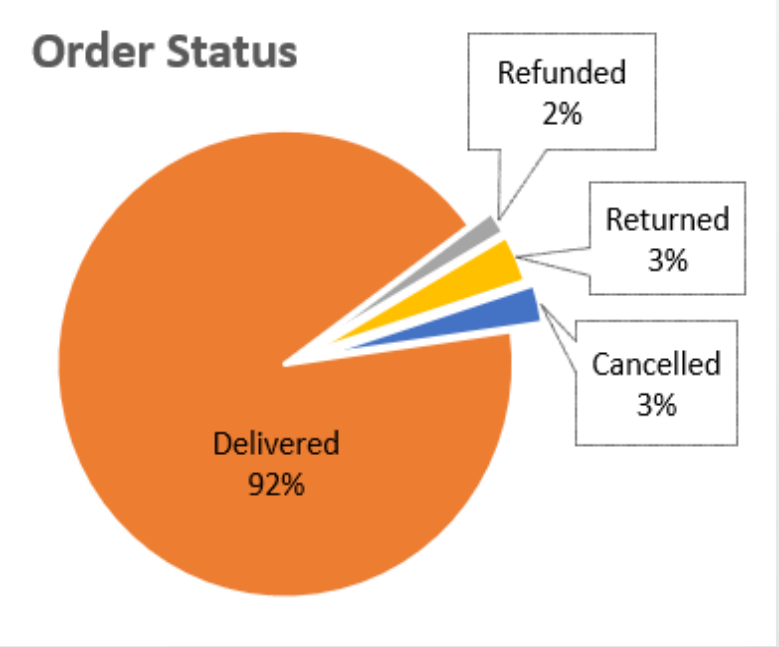
Sales Distribution Across Top 5 States

- 🥇 **Maharashtra (~₹29.9L)** → Highest sales
- 🥈 **Karnataka (~₹26.5L)** → Second highest
- 🥉 **Uttar Pradesh (~₹21.0L)** → Moderate contribution
- 📉 **Telangana (~₹17.1L) & Tamil Nadu (~₹16.8L)** → Lower among top 5
- 🔝 **Top 2 states contribute majority of sales**
- 📊 Sales are **concentrated in a few key states**



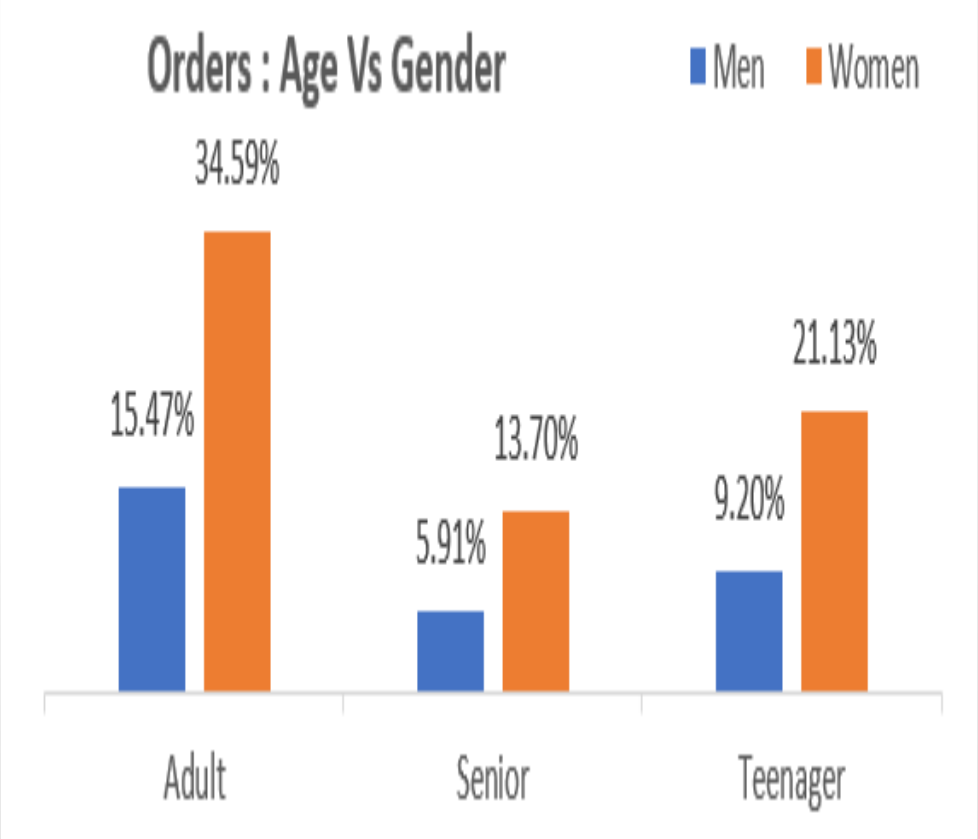
Order Status Distribution

- 📦 **Delivered (92%)** → Majority of orders successfully completed
- ❌ **Cancelled (3%)** → Small portion of orders cancelled
- 🔁 **Returned (3%)** → Minor returns
- 💸 **Refunded (2%)** → Very low refunds
- 👍 **High success rate** → Strong operational performance
- ⚠️ **Returns & cancellations are minimal** but can be improved



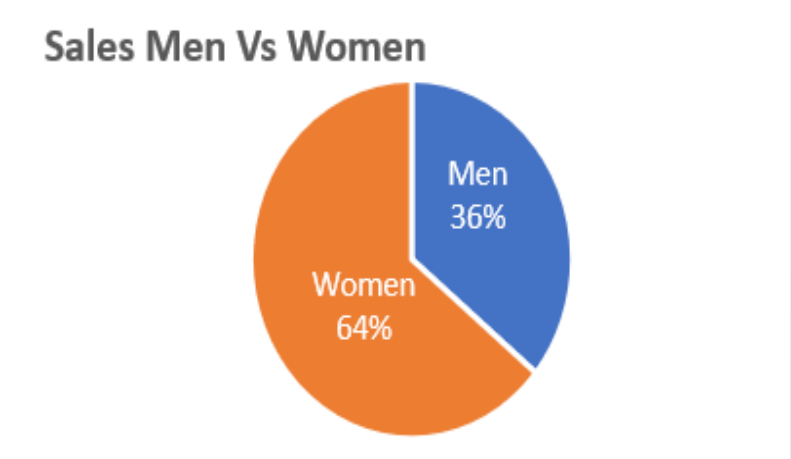
Order Distribution By Age Group & Gender

- 👩 **Women dominate across all age groups**
- 📈 **Adults** → Highest contribution
- Women: **34.6%**, Men: **15.5%**
- 🧑 **Teenagers** → Second highest
- Women: **21.1%**, Men: **9.2%**
- 👴 **Seniors** → Lowest contribution
- Women: **13.7%**, Men: **5.9%**
- 🔍 **Women contribute ~2x more orders than men** in each category
- 📊 **Adults are the primary customer segment**



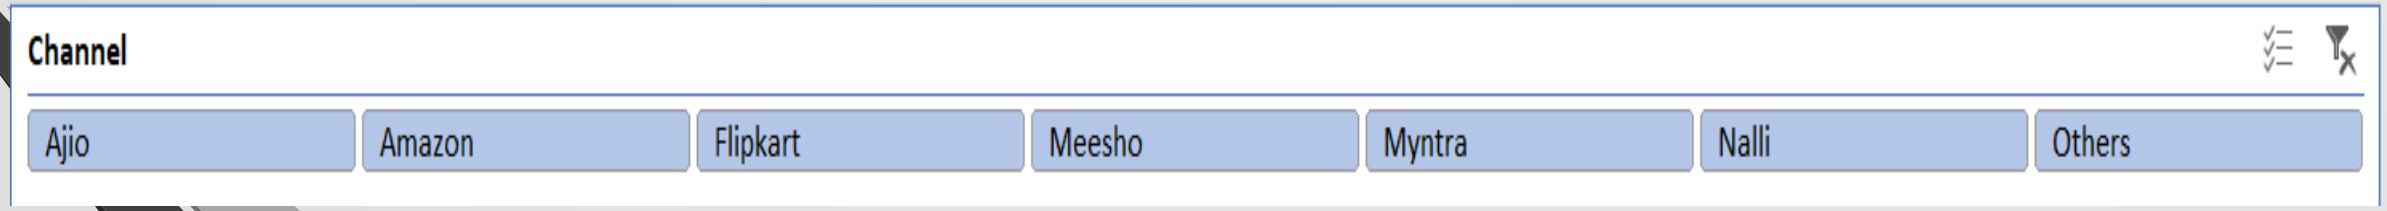
Sales Contribution By Gender

- 👩 **Women (64%)** → Majority of total sales (~₹1.36 Cr)
- 👨 **Men (36%)** → Lower contribution (~₹76.1L)
- 📈 **Women generate nearly 2x more sales than men**
- 🎯 Indicates **strong female customer base**



Filters Panel

- 📅 **Month slicer** → Filter data by specific months
- 👗 **Category slicer** → Filter by product types (Saree, Kurta, etc.)
- 🛒 **Channel slicer** → Filter by sales platforms (Amazon, Flipkart, etc.)
- ⚡ Helps in **interactive analysis**
- 🔍 Allows quick comparison across **time, product, and platform**



📊 Final Conclusion

- 🎯 Focus marketing on **women (especially adults)**
- 🛍️ Strengthen presence on **top-performing platforms**
- 📉 Improve strategies for **low-performing months (Sep–Nov)**
- 📍 Expand in **high-performing states** and target similar regions
